

dear ECCE members,

back from Brussels, where the 6th European Congress for People with Special Needs and the ECCE General Meeting took place, I am forwarding to you an information from our Romanian members.

with best regards

Dear friends

Please excuse our absence from the ECCE meeting and the congress. The centres for curative education and social therapy in Romania are bravely maintaining their work and activity in spite of the very difficult economic conditions and social circumstances that are not conducive to a buoyant development.

We do hope that the proposal for a Partnership programme between institutions was positively followed up. Such partnerships have been of great importance to establishing and maintaining the quality of our work here in Romania and we would welcome intensification of such exchange and especially professional and simply human encounter, for co-workers, parents and beneficiaries alike. Would there be EU or other funding for such a programme, as was for CESTE-Net?

With greetings to you all.

Roxana and John

on behalf of the Federations for Curative Education and Social Therapy in Romania

John E Byrde
